

Project updates since September 12

Civil Craft | Feature and major-change summary, dated timeline, and a complete commit ledger. Snapshot: September 26, 2026, 05:19 (UTC+8).

84	14	main	4749f1f
commits reviewed	active dates	Git branch	snapshot commit

Scope. This is a review of committed changes dated September 12-26, 2026 on the local main branch. Project working tree at initial capture: clean (report files excluded). It describes repository evidence, not a verified release or a claim that every feature passed device testing.

Major feature and system updates

Bridge building, physics, and lessons

- Added deterministic bridge stress analysis and refined stress colors, failure handling, visual bending/collapse, and rope presentation (Sep 13, 21, 24).
- Improved copy/paste previews, tutorial anchor highlighting, pier dragging, and paste snapping/input gating (Sep 12-13, 18, 21, 25).
- Added simulation lesson definitions and UI for beam, bending, truss, and generic bridge explanations; later limited lesson slow motion to authored location lessons (Sep 21, 25).
- Added Reed Side Inspection and Vance Side Realignment contract assets, with build-location and interaction changes around the side-contract workflow (Sep 24-26).

Cargo, live load, and progression

- Expanded vehicle cargo slots, cargo persistence, delivery validation, minimum cargo/loading progression, and visual loading guidance (Sep 14, 20).
- Added smart truck loading zones and loading animation, then continued live-load, failure, and contract-state fixes (Sep 21, 26).
- Added stable-ID NPC phase movement and later refined story resume, objective persistence, NPC navigation, and dialogue/tutorial content (Sep 14-21).

Player, UI, and online play

- Expanded player cosmetics, character model migration, Almanac customization, shop data, and loading-screen avatar preview (Sep 17-19).
- Tied Edit Player access to the Shop unlock, then added a guided Safety Vest purchase/equip tutorial and restricted unrelated shop actions during that flow (Sep 24-25).
- Integrated PlayFab cloud-save/authentication changes, created multiplayer scene/network flows, migrated to Photon Fusion, and added bridge/live-load/completion synchronization work (Sep 22-26).

Dated update timeline

Sep 12	Almanac tab and first bridge-completion tutorials; tutorial completion/resume coordination; path-guidance refresh; dynamic pier anchors and collider cleanup.
Sep 13	Deterministic stress solver; copy/ghost preview and UI/input fixes; Canyon Crossing layout and pause diagnostics.
Sep 14	Stable-ID NPC phase movement; expanded bridge and cargo systems; vehicle slot and persistence work; NPC sprinting and tutorial delivery validation.
Sep 15	Bhan cargo/story, environment, live-load, and bridge-system edits in a broadly named commit.

Sep 17	Respawn/story resume/objective persistence improvements; loading-screen and results/scene-flow changes.
Sep 18	Character model/cosmetics and Almanac shop integration; tutorial anchor highlighting and input gating; loading player-preview work.
Sep 19	NavMesh destination validation; NPC routing; lessons, contracts, cosmetics, shop, and scene-content updates.
Sep 20	Cargo completion progression and loading guidance; contract and slot changes; minimap and save/objective updates.
Sep 21	Smart cargo loading and animation; simulation lessons and fail/complete UI; visual bridge/rope and pier fixes; minimap player marker; dialogue polish.
Sep 22	Cloud-save authentication and contract-state persistence; online/mobile/URP configuration and simulation-system updates.
Sep 23	Initial multiplayer scene, network connection/avatar, scene-flow, and ping-display work.
Sep 24	Photon Fusion migration; runtime stress-visualization work; Shop/Edit Player unlock gating and tutorial extension; Reed side-contract asset.
Sep 25	Safety Vest buy/equip tutorial and shop restrictions; tutorial paste tuning; side-contract and scene content; new Town River building assets.
Sep 26	Town River environment asset imports and road-surface authoring; multiplayer avatar, bridge, completion UI, live-load, and contract progression sync.

What this report does not establish

- Commit history confirms files and changes were recorded, but not that every contract, online flow, or mobile build has been play-tested end-to-end.
- Several commit messages are generic or opaque (for example, 'updates' or single letters). The timeline uses changed-file scope for those commits; the full ledger below retains their exact messages.
- Large vendor and art imports are reported as assets/infrastructure, not as proof of a finished playable map or multiplayer release.

Complete commit ledger

All 84 non-merge commits in the date range, newest first. Short hashes are included so each item can be inspected with Git. Messages are shown as recorded, including generic ones.

Date	Commit	Recorded commit message
09-26	4749f1f	Improve multiplayer live-load sync and contract progression
09-26	9697416	Sync multiplayer bridge state and completion UI
09-26	be14d66	Expand Civil Craft thesis gameplay systems
09-26	b08a109	Add modular AI agent workflows
09-26	b77d488	Add modular terrain generation and construction systems
09-26	f715c3e	Refactor Civil-Craft project structure
09-25	ac6eb93	Add procedural building generation and interaction
09-25	3771479	Update Civil-Craft project assets
09-25	f9cccbf	Restrict lesson slow motion to authored location lessons
09-25	616e86a	Improve tutorial bridge paste snapping and runtime tuning
09-25	ad626f5	Lock shop interactions during Safety Vest tutorial
09-25	c0a0d9b	Add guided Safety Vest equip tutorial flow
09-24	6892769	Gate player customization behind shop unlock and extend shop tutorials

Date	Commit	Recorded commit message
09-24	69ba3d4	Restore bridge stress visuals between simulations
09-24	6f75618	Optimize runtime stress visualization and deterministic simulation state
09-24	2bfc7ee	Update Civil-Craft thesis project assets
09-24	e1aa463	Update Civil Craft Project Assets
09-24	e26a2b2	migrated to photon
09-23	7792a20	.
09-23	9ae8890	updates
09-23	561c27f	Update Multiplayer.unity
09-23	97d3ad3	Multiplayer Starts
09-22	32b01ca	Update Civil-Craft thesis project assets
09-22	b712261	online
09-22	f32f53a	Integrate cloud save authentication and contract state persistence
09-21	bd8ef55	Polish Canyon Crossing dialogue and tutorial text
09-21	e2e8a52	r
09-21	0c75c78	Refactor gameplay systems and update project content
09-21	808308f	Update Civil-Craft project systems and assets
09-21	7b58d2a	Fix pier dragging and add player marker to expanded minimap
09-21	d1f906f	Stabilize visual bridge physics after member failure
09-21	538c755	Update Civil-Craft gameplay systems and project configuration
09-21	037c8b5	Update Civil-Craft implementation
09-21	1aa8f73	Implement Civil-Craft gameplay updates
09-21	5c4b608	Update Civil-Craft systems and project assets
09-21	302d838	Implement Civil-Craft thesis systems and project configuration
09-21	a7280cf	Add smart cargo loading zones and vehicle loading animation
09-20	3db56b5	Add cargo completion progression and visual loading guidance
09-20	4bd1525	Refactor Civil-Craft systems and update project configuration
09-20	73cb100	Update Civil-Craft thesis project assets
09-19	5408d7b	Update Civil-Craft gameplay systems and project assets
09-19	befedd7	Validate NavMesh destinations and remove stale helper surfaces
09-19	c059a01	Refactor project structure and update implementation files
09-18	f1d22a5	Update Civil-Craft project files
09-18	93fe843	Improve tutorial anchor guidance and input gating
09-18	dd69e83	Fix tutorial anchor highlighting and cosmetic icons
09-18	9ed3513	Highlight tutorial anchors in bridge selection outlines
09-18	0f1a037	Remove obsolete code and simplify project structure
09-18	e331748	Implement thesis gameplay systems and supporting configuration
09-18	f5477e4	Refactor Civil-Craft project assets
09-18	d504104	Add player character model migration and UI defaults
09-18	e378259	Update Civil-Craft project assets
09-18	8c97397	Refactor Civil-Craft systems and update gameplay implementation
09-18	a3796ba	Add cosmetics prefab and reposition UI elements
09-18	ad3f213	Refactor Civil-Craft thesis systems

Date	Commit	Recorded commit message
09-17	5849026	Update Civil-Craft gameplay systems and supporting assets
09-17	57cd3c0	Improve respawn, story resume, and objective persistence
09-17	bbbfa95	Refactor Civil-Craft project systems and assets
09-17	db205ec	Update project assets and implementation
09-15	25cd0af	ewan ku na
09-14	7556600	Enable NPC sprinting and tutorial cargo delivery validation
09-14	31fa538	Refactor Civil-Craft systems and project structure
09-14	32cdb9f	Expand building systems and refine simulation mechanics
09-14	66e1999	commiters
09-14	4f7cffa	Add phase movement by stable ID
09-14	d95a25a	Expand bridge-building systems and gameplay content
09-13	12ebe23	Improve construction workflow and spatial interactions
09-13	91343a1	Fix UI rendering, ghost paste previews, physics reset, and input safety
09-13	69b4bdc	Offset the copy preview after stamping
09-13	4a70626	Fix CanyonCrossing UI layout and add pause diagnostics
09-13	72fcf6c	Add deterministic bridge stress analysis
09-13	3fd5203	Improve civil construction workflows and project systems
09-13	3cbcf9d	a
09-12	224c7c9	F
09-12	894e0ce	BULDAK
09-12	0f1f829	,
09-12	bce32f6	m
09-12	cdeb7ac	Manage dynamic pier anchors and remove pier cap colliders
09-12	40c9aba	Coordinate tutorial completion events and suspended resume holds
09-12	f84da55	Add Almanac tab unlock tutorials
09-12	3fd58e1	Add first-completion tutorial to bridge results screen
09-12	988f79b	Refactor project files
09-12	4f57124	Fix path guidance trail trimming and respawn refresh
09-12	61d69a3	Update Civil-Craft project implementation

Source and method

Source: local Civil Craft Git repository, branch main, HEAD 4749f1f. Collected with git log using Sep 12 00:00 through Sep 26 23:59 (UTC+8), excluding merge commits; reviewed commit file lists and selected diffs for the thematic summary. The Git record contains 84 commits across 14 dates. No runtime benchmark or release validation was performed for this report.
